## Communication Laboratory

〒110-0016  
東京都台東区台東 3 - 4 - 2  
Tel & Fax : 03 - 5688 - 0493

Company Name Amplet Communication Laboratory  
Established Sep. 9, 1987  
Location 4-2, Taito 3-chome, Taito-ku,  
Tokyo 110-0016, Japan

所長  
工学博士 根日屋 英之  
Dr. Hideyuki Nebiya  
President and C.E.O.

副所長  
工学博士 塚本 信夫  
Dr. Nobuo Tsukamoto  
Executive Vice President

Dr. Nehiya, President of AMPLET Communication Laboratory, said that new businesses will succeed if they invent "indispensable" items that go beyond "convenient if available."

All of the staff members of the AMPLET Communications Laboratory have doctoral degrees in engineering, and since the parent company, AMPLET, Inc. was a wireless equipment design company, they have plenty of development facilities and can provide technical advice based on experimental results, rather than just verbal advice.

Since its establishment in 1987, AMPLET Communication Laboratory has been debt-free and self-funded, with no capital introduced by other companies.

New business plan for wireless communications

Making into a product

Consulting Agreement with AMPLET Communication Laboratory

AMPLET Communication Laboratory is a wireless communications technology consulting company operated by two engineering Doctors.

While receiving AMPLET's technical consulting services, our young engineers will be able to improve their technical skills at the same time.
